Registered Patent#: 7338067

## What is **neto grip™**?

**neto grip™** is a patented magnetic grip system, that uses rare earth magnets, LineX® **neto grip™** magnetics, Hotline® wetsuit constructed **neto grip™** chips, water jet and laser cut, acrylic and poly carb plastics, high grade stainless screws, bring you the most progressive, innovated magnetic design to the public market.

With over six years of research and development in northern California, **neto grip™** is tried, tested and neto approved! **neto grip™** is rewriting the board sports history book, with new state of the art magnetic grip systems. **neto grip™** is the first of it's kind and the only magnetic grip system on the market today. **neto grip™** is the past, present & future. . . . **Join the netolution!**

## Is **neto grip™** for all skill types?

Yes. **neto grip™** is for all levels of surfing, kite boarding, etc. From first year learner to novice, all the way to expert/professional.

## Will **neto grip™** release it's magnetic pulling force when needed?

Yes. **neto grip™** will release it's magnetic grab by simply lifting your heel. Conventional straps can be very difficult to release from in critical situations, resulting in twisted ankles and knees. Ted Flaig says, "I surfed **neto grip™** on twenty footers; down to

one foot, where I was magnetically glued on my board and released when needed. **neto grip™** holds you on your board solidly and releases before the twisting or breaking point on your joints." **neto grip™** equals freedom of stance with a magnetic grip that sticks like no other.

## How do I install **neto grip™** in my board?

**neto grip™** is working with Leslie Anderson of Fatty Fiberglass, along with surfboard shapers from Southern California, to Northern California – John Rodenberry of JHR Boards, Shawn Rhoads and Brent Hudson with Neptune Boards, Jeff Rashe of MIO Boards, John Carpenter JC Boards, Rusty Preisendorfer of Rusty, Bob Pearson with Arrow Surfboards, and the list goes on. Check [netogrip.com](http://netogrip.com) to find your nearest shaper/official **neto grip™** installer today.

## About **neto grip™**:

**neto grip™** is a roots company, based out of Northern California. In this geography, there are lots of unruly, rocky, kelpy, bumpy, shark ridden waters that produce some of the most consistent surf in the world. **neto grip™** has been tested in this region for over six years. **neto grip™** parts and pieces are manufactured and

assembled by professionals in the USA. **neto grip™** is tight and neto solid©. **neto grip™** chips© are constructed exclusively by Hotline® wetsuits. **neto grip™** magnets are of the highest quality, rare earth, super magnets. Mendo Truck is the official LineX® sprayer, for **neto grip™** magnets. The holding force of generation 2's magnets is approximately sixty-eight pounds, with LineX® **neto grip™** hardware is all high grade stainless steel, for rust and corrosion free parts. **neto grip™** boxes are made of top quality poly carb and acrylic plastics, laser and water cut to true dimension. **neto grip™** strives to keep up constant research and development, to bring you the most progressive, up-to-date newest **neto grip™** generations.

**neto grip™** uses no straps, less wax, and ups the skill facts.

**DISCLAIMER: USE AT YOUR OWN RISK!** **neto grip™** magnets have 72 pounds of holding force. 144 lbs could snap on your hands or other parts of your body, resulting in serious injury. Read all warnings and instruction labels. **Handle with care.** Always keep **neto grip™** magnets at least one foot apart when taken out of **neto grip™** Gen2 box. Keep out of reach of children. Adult supervision is advised. These magnets are NOT toys. **neto grip™** takes no responsibility for misuse or otherwise that may result in serious injury. Keep away from all pacemakers.
